

The Plasma Column

Coming Soon!!!!

Brothers and Sisters,

This blurb from the LU 72 JATT Welder Training Center will be a great resource of welding tips, tricks and technology beneficial to you as a UA member welder working in the industry or as the home hobbyist.

The welding related articles in the column will be in a random fashion. If there is anything in particular you desire to have posted for discussion, please comment.

Come on out to the welding school and pick up a new certification or revive an old one. The shop has been hopping with our new semester apprentices and a constant flow of journeymen working on that money maker certification that is always in high demand, a ASME Union Pipe Welder Certification.

If you have weld certifications and need to get continuity, we can sign off during any regular Saturday test session.

Fraternally, Cajun Seeger Welding Director
